

# Materiality and identifying what matters

Being a billion dollar large scale enterprise, means accepting the large environmental footprint and social impact in nearly every conceivable aspect, whilst also attempting to make a net positive impact on almost each of those areas. While some of the materiality issues may appear low priority as on date, there is acceptance of the need to mitigate its negative aspect, at a minimum

The materiality mapping has been reviewed and validated by the senior management and takes into consideration stakeholder needs and expectations as well as importance to Welspun India’s business. The prioritization of aspects are done on the basis of the various capitals and also takes into account global megatrends and business drivers that could not only have an impact on our operations but also on our value chain

## Materiality mapping
